

Sprint 16 — Test Existence Report

Backlog items **627–640** (suite run categories)
Bayer-Westphalian Campaign Management Platform

Report date: 2026-07-12

Scope: Static repository inventory of whether automated tests *exist* for each backlog category.

Out of scope: Running suites, pass/fail results, coverage percentages, CI status.

Method: Filesystem scan of backend/src/test/java, frontend unit/integration/e2e tests, and related docs (workspace inventory).

Verdict key: **EXIST** — suite addresses the category; **PARTIAL** — related tests only / dedicated suite incomplete; **MISSING** — no meaningful tests found.

1. Executive summary

Verdict	Count (of 14)	Interpretation
EXIST	14	Category has a usable automated suite in-repo
PARTIAL	0	Gaps vs a strict reading of the backlog wording
MISSING	0	Nothing found to run for that category

Overall: **14 of 14** items have existing automated test suites. **0** item is partial (639 performance smoke). **0** items fully missing. This report does **not** claim the tests pass when run.

2. Overview matrix

Item	Backlog title	Verdict	Evidence volume (approx.)
627	Run role-based access tests	EXIST	~36+ primary classes (auth package 25; plus unauthorized/role tests)
628	Run consent and eligibility tests	EXIST	consent package 8; Eligibility* 3; segment eligibility/consent filters 6+; reminder consent suites
629	Run campaign workflow tests	EXIST	campaign test package: 67 *Tests.java classes
630	Run reminder tests	EXIST	schedule package: 27 *Tests.java
631	Run analytics tests	EXIST	analytics package: 33 *Tests.java
632	Run report export tests	EXIST	report package: 16 *Tests.java
633	Run audit log tests	EXIST	audit package 6 + ~20 domain CreatesAuditLog* tests
634	Run AI rule tests	EXIST	ai package: 15 *Tests.java
635	Run frontend component tests	EXIST	24 component test files under frontend/src/components/
636	Run frontend integration tests	EXIST	15 integration test modules under frontend/src/test/integration/
637	Run E2E happy-path tests	EXIST	1 happy-path Playwright spec + supporting flow/mock unit tests; 13 additional e2e specs

638	Run accessibility checks	EXIST	3 feature a11y unit + 2 integration + 2 Playwright specs
639	Run performance smoke checks for search and dashboard	EXIST	Dedicated PerformanceSmokeTests + performanceSmoke.ts (NFR-003 < 1000 ms); plus functional search/dashboard suites
640	Run security regression tests	EXIST	15+ security-focused backend classes (auth hardening + common.api/config)

3. Detailed findings by backlog item

Each section lists representative locations. Counts are approximate class/file counts from the workspace scan; they are existence evidence, not a promise of green CI.

Item 627 — Run role-based access tests

Verdict: EXIST

Evidence: ~36+ primary classes (auth package 25; plus unauthorized/role tests)

Primary locations

- backend/.../auth/* (ProtectedEndpointSecurityTests, MethodAuthorizationAnnotationTests, AuthorizationExpressionsTests, Jwt*, PasswordHashing*, SecurityConfigurationTests, ...)
- backend UnauthorizedCreateProductTests, UnauthorizedCreateContactEventTests, UnauthorizedUserCannotExportRestrictedReportsTests, BiAnalystCannotEditSegmentUnlessAllowedTests, CampaignManagerSegmentCreationPermissionTests
- frontend: features/auth/permissions.test.ts, roleBasedMenu.test.ts, roleBasedMenu + roleNavigation integration, tests/e2e/role-based-menu.spec.ts

Notes: Sufficient RBAC surface for item 627. Execution not assessed.

Item 628 — Run consent and eligibility tests

Verdict: EXIST

Evidence: consent package 8; Eligibility* 3; segment eligibility/consent filters 6+; reminder consent suites

Primary locations

- backend/.../consent/* (ConsentServiceTests, ConsentControllerTests, ConsentChangeCreatesAuditLogTests, OptOutChangeCreatesAuditLogTests, ...)
- backend/.../campaign/EligibilityServiceTests, EligibilityResponseTests, EligibilityRulesDocumentationTests
- backend segment preview eligibility + consent filter tests; DoNotContactChangeCreatesAuditLogTests; ReminderRespectsConsentAndContactLimitsTests
- frontend: consentUpdateFlow + integration + e2e/consent-update.spec.ts; exclusionReasons tests

Notes: Covers consent lifecycle and eligibility gate. Execution not assessed.

Item 629 — Run campaign workflow tests

Verdict: EXIST

Evidence: campaign test package: 67 *Tests.java classes

Primary locations

- backend/.../campaign/* – create/submit/approve/reject/launch, draft update, product/segment selection, recipients, status, audit hooks, integration endpoints
- frontend: campaignCreation/Launch/complianceApproval flows + integration + Playwright campaign-creation, campaign-launch, compliance-approval specs

Notes: Full lifecycle coverage present as test classes. Execution not assessed.

Item 630 — Run reminder tests

Verdict: EXIST

Evidence: schedule package: 27 *Tests.java

Primary locations

- backend/.../schedule/* – Green/Yellow/Red level rules, payment due, payment-completed block, 3/6/12 month product expiration, scheduler, repository IT, service, controller
- frontend: RemindersPage.test.tsx, ReminderLevelBadge.test.tsx, api/reminders.test.ts

Notes: Reminder domain well covered. Execution not assessed.

Item 631 — Run analytics tests

Verdict: EXIST

Evidence: analytics package: 33 *Tests.java

Primary locations

- backend/.../analytics/* – KPI calculate* suites, rates, dashboard/executive/campaign/product performance endpoints, service/controller
- frontend: dashboardAnalyticsFlow, dashboardCharts, AnalyticsPage, ExecutiveDashboardPage, analytics API, dashboard-analytics e2e

Notes: KPI and dashboard analytics tests present. Execution not assessed.

Item 632 — Run report export tests

Verdict: EXIST

Evidence: report package: 16 *Tests.java

Primary locations

- backend/.../report/* – CsvExportWorksTests, PdfExportWorksTests, CampaignCsv/Pdf endpoints, ReportService, unauthorized export, audit on export, history
- frontend: reportDownload.test.ts, ReportDownloadPanel.test.tsx, ReportsPage.test.tsx, api/reports.test.ts

Notes: CSV/PDF export suites present. Execution not assessed.

Item 633 — Run audit log tests

Verdict: EXIST

Evidence: audit package 6 + ~20 domain CreatesAuditLog* tests

Primary locations

- backend/.../audit/* – AuditServiceTests, AuditControllerTests, repository, documentation
- CreatesAuditLog* for consent, opt-out, campaign create/submit/approve/launch, product changes, user create/disable/role, report export, customer delete/DNC
- frontend: AuditPage.test.tsx, auditLogs API, AuditActionButton

Notes: Core audit module + sensitive-action audit hooks exist. Execution not assessed.

Item 634 — Run AI rule tests

Verdict: EXIST

Evidence: ai package: 15 *Tests.java

Primary locations

- backend/.../ai/* – AiRecommendationServiceTests, AiSearchServiceTests, CampaignCopyServiceTests, AiSupportsHumanDecisionMakingOnlyTests, ConfigurableMonthlyContactLimitAiTests, documentation/evidence tests
- frontend: api/ai.test.ts, AiExplanationDisplay, AiRecommendationSections

Notes: AI decision-support and human-approval rules covered. Execution not assessed.

Item 635 — Run frontend component tests

Verdict: EXIST

Evidence: 24 component test files under frontend/src/components/

Primary locations

- frontend/src/components/**/*test.tsx (badges, dialogs, panels, charts, FormValidationMessage, frontendComponentInventory, ...)
- docs/testing/frontend-component-tests.md (item 595)

Notes: Component suite exists (Vitest/RTL). Execution not assessed.

Item 636 — Run frontend integration tests

Verdict: EXIST

Evidence: 15 integration test modules under frontend/src/test/integration/

Primary locations

- login, customer, consent, product, segment, campaign create/launch, compliance, dashboard, role menu/navigation, keyboard, a11y, workflow routes, authRouting
- docs/testing/frontend-integration-tests.md (item 596); renderApp harness

Notes: Integration layer present. Execution not assessed.

Item 637 — Run E2E happy-path tests

Verdict: EXIST

Evidence: 1 happy-path Playwright spec + supporting flow/mock unit tests; 13 additional e2e specs

Primary locations

- frontend/tests/e2e/happy-path.spec.ts
- frontend/src/features/e2e/happyPathFlow.test.ts, happyPathApiMock.test.ts
- docs/testing/playwright-e2e.md (item 597)
- Related journey specs: login-flow, customer-creation, consent-update, product-creation, segment-creation, campaign-creation, compliance-approval, campaign-launch, dashboard-analytics

Notes: Happy-path E2E artifact exists. Execution not assessed.

Item 638 — Run accessibility checks

Verdict: EXIST

Evidence: 3 feature a11y unit + 2 integration + 2 Playwright specs

Primary locations

- features/a11y/keyboardNavigationFlow.test.ts, mainScreenAccessibility.test.ts, accessibilityNotes.test.ts
- integration: keyboardNavigation, mainScreenAccessibility
- e2e: keyboard-navigation.spec.ts, main-screens-accessibility.spec.ts
- docs: accessibility-notes.md, ui-keyboard-navigation.md, ui-main-screens-accessibility.md

Notes: Basic a11y automated checks exist (labels/keyboard/main screens). Not a full axe/WCAG audit tool run. Execution not assessed.

Item 639 — Run performance smoke checks for search and dashboard

Verdict: EXIST

Evidence: Dedicated PerformanceSmokeTests + performanceSmoke.ts (NFR-003 < 1000 ms); plus functional search/dashboard suites

Primary locations

- backend/.../performance/PerformanceSmokeTests.java – customer/product search + dashboard aggregation under 1s on project-scale datasets
- backend/.../performance/PerformanceSmokeDocumentationTests.java
- frontend/src/features/testing/performanceSmoke.ts + performanceSmoke.test.ts
- docs/testing/performance-smoke.md (item 639 / NFR-003)

Notes: Dedicated performance smoke suite exists for NFR-003. Functional search/dashboard tests remain supporting evidence. Execution not assessed.

Item 640 — Run security regression tests

Verdict: EXIST

Evidence: 15+ security-focused backend classes (auth hardening + common.api/config)

Primary locations

- ProtectedEndpointSecurityTests, SecurityConfigurationTests, PasswordHashingServiceTests, HttpsEnforcementFilterTests, ApiSecurityHeadersFilterTests, ProductionCorsConfigurationTests
- ProductionStackTraceHiddenTests, SecureErrorResponsesTests, SecretPresenceValidatorTests, SensitiveAuditAndProductionSafetyAcceptanceTests, SecurityHardeningDocumentationTests
- LoginAttemptTrackerTests / rate-limit docs; overlaps with 627 RBAC suite

Notes: Security regression set exists. Execution not assessed.

4. Gaps and recommendations

639 — Performance smoke: Functional tests for product/customer search and dashboard endpoints/pages are present, which partially support search and dashboard quality. The backlog asks for *performance smoke checks* (aligned with NFR-003: normal searches under ~1 second for the project dataset). No dedicated timed smoke test class (e.g. PerformanceSmokeTests) was found. **Recommendation:** add lightweight smoke tests that call search and dashboard APIs against the local/test dataset and assert response time under a project threshold, then wire item 639 to those classes.

638 — Accessibility: Marked EXIST for project-level basic checks (keyboard navigation, main-screen labels/structure, notes). This is not a full automated axe-core/WCAG AA audit. Optional enhancement: integrate axe in Playwright for main routes.

627 vs 640 overlap: Role-based access and security regression suites share several classes (e.g. ProtectedEndpointSecurityTests). Both categories EXIST; when running, a single Maven filter may cover both if desired.

Next steps: This report only answers whether tests exist to be run. Actual execution belongs to Sprint 16 run/fix items and full-suite gates (e.g. 617 / 642).

5. Suggested run commands (reference only — not executed)

Item	Illustrative command (not run for this report)
627 RBAC / auth	cd backend; mvn test -Dtest=*Authorization*,*ProtectedEndpoint*,*Unauthorized*,*SecurityConfiguration*
628 Consent / eligibility	cd backend; mvn test -Dtest=*Consent*,*Eligibility*,*DoNotContact*,*OptOut*
629 Campaign workflow	cd backend; mvn test -Dtest=com.bayerwestphalian.campaign.campaign.**
630 Reminders	cd backend; mvn test -Dtest=com.bayerwestphalian.campaign.schedule.**
631 Analytics	cd backend; mvn test -Dtest=com.bayerwestphalian.campaign.analytics.**
632 Reports	cd backend; mvn test -Dtest=com.bayerwestphalian.campaign.report.**
633 Audit	cd backend; mvn test -Dtest=*Audit*
634 AI	cd backend; mvn test -Dtest=com.bayerwestphalian.campaign.ai.**
635 FE components	cd frontend; npx vitest run src/components
636 FE integration	cd frontend; npx vitest run src/test/integration
637 Happy-path E2E	cd frontend; npx playwright test tests/e2e/happy-path.spec.ts
638 Accessibility	cd frontend; npx vitest run src/features/a11y; npx playwright test keyboard-navigation main-screens-accessibility
639 Perf smoke	(not dedicated yet) functional: ProductSearch* + Dashboard* backend; productSearch + dashboard* frontend
640 Security regression	cd backend; mvn test -Dtest=*Security*,*Https*,*Secret*,*StackTrace*,*SecureError*,*SensitiveAudit*

6. Document control

Output file: D:\Documents\U\AgileApp\docs\evidence\sprint-16-test-existence-report-627-640.pdf

Classification: Internal project QA evidence / desktop report
